External Trade – key points: June 2010

New Zealand's merchandise exports were valued at \$40.7 billion in the year ended June 2010, down 5.5 percent from \$43.0 billion in the June 2009 year. This annual decrease is the first for a June year since 2003.

The largest decrease in export value was in meat, down 8.5 percent (\$468 million) for the year. The second largest decrease was in starch (which includes casein), down 33 percent (\$436 million). The largest offsetting increase was from wood, up 13 percent (\$307 million).

The total value of New Zealand's imports for the year ended June 2010 was \$40.0 billion, down 13 percent from \$46.1 billion in the June 2009 year. The decrease in import values was due to a variety of commodities, including:

- machinery – down 17 percent or \$1.0 billion
- electrical machinery – down 20 percent or \$865 million
- mineral fuels – down 11 percent or \$825 million.

A 113 percent (\$180 million) increase in ships partly offset the decrease in total imports for the year ended June 2010.

Exports

- Australia continued to be New Zealand's principal export market, receiving 24 percent or \$9.7 billion of New Zealand's exports for the year ended June 2010. China has become New Zealand's second largest export market, receiving 10 percent of total exports or \$4.1 billion. The United States is the third-largest export market, receiving 8.7 percent of total exports or \$3.6 billion.
- Exports to APEC economies accounted for 71 percent of New Zealand's total exports and were worth \$29 billion in the year ending June 2010. The European Union accounted for 12 percent (\$5.0 billion) of total exports.
- The [Harmonised System \(HS\)](#) chapter heading 'dairy' continued to be New Zealand's largest export earner in the June 2010 year, accounting for 22 percent of total merchandise exports and valued at \$8.9 billion. Meat and wood were our two next-largest export products, accounting for 12 and 6.5 percent of total exports, respectively.
- Applying the [level of processing \(LOP\) classification](#), in the year ending June 2010, 69 percent of all exports were primary products and 26 percent were manufactured goods. Of the primary products, 51 percent were processed. Of the manufactured goods, 65 percent were elaborately transformed. New Zealand exported 39 percent of all manufactured goods and 17 percent of all primary products to Australia. Seventy-nine percent of manufactured goods exported to Australia were elaborately transformed.

Imports

- Australia remained New Zealand's largest source of merchandise imports in the year ended June 2010, accounting for 19 percent of total imports. Total imports from Australia were valued at \$7.8 billion, a 4.0 percent decrease from the June 2009 year. China was New Zealand's second-largest source of imports, with an 8.1 percent decrease over the same period, and a value of \$6.1 billion, or 15 percent of total imports. Other major sources of imports for New Zealand were the United States and Japan, which respectively accounted for 10 and 7.0 percent of total imports.
- Imports from APEC economies were valued at \$30 billion and accounted for 74 percent of total imports in the year ended June 2010. Imports from the European Union were valued at \$5.8 billion for the June 2010 year, and were 15 percent of total imports.
- New Zealand's highest-valued imported HS chapter heading in the year ended June 2010 was mineral fuels, worth \$6.5 billion and accounting for 16 percent of total imports. Other significant imports included machinery (\$4.8 billion), vehicles (\$3.7 billion), and electrical machinery (\$3.5 billion).

- Under the LOP classification, in the year ending June 2010, 29 percent of all imports were primary products and 70 percent were manufactured goods. Of the primary products, 53 percent were processed. Of the manufactured goods, 88 percent were elaborately transformed. Manufactured goods are imported from a variety of countries, with just over half of these goods being sourced from China, Australia, and the United States.

Services

In the year ended June 2010, New Zealand's service exports were worth \$12.2 billion, down \$542 million from the June 2009 year. New Zealand imported services to the value of \$12.2 billion in the year ended June 2010, down \$1.3 billion from the June 2009 year.

Overseas visitors

Permanent, long term, and short-term overseas visitor arrivals numbered 2.6 million in the year ended June 2010, an increase of 84,000 visitors from the June 2009 year. The largest sources of visitors to New Zealand in the year ended June 2010 were Australia with 45 percent of all visitors, the United Kingdom with 10 percent, and the United States with 7.8 percent.

General issues

The commodity tables show the principal markets for New Zealand's exports (and some imports) of several product groups, including agriculture, non-agriculture, dairy, meat, fruit and vegetables, forestry, and machinery. Economic groupings, and the geographic country aggregations that make up the geographic regions used in the text, are defined in the appendices at the end of this publication. Other definitions, for example the services definitions, are those Statistics New Zealand uses and are based on standard International Monetary Fund criteria. A summary of these definitions also appears at the end of this publication.

1. Includes overseas migrants who arrive in New Zealand intending to stay for a period of 12 months or more (or permanently), plus New Zealand residents returning after an absence of 12 months or more.

2. These totals are actual counts and may differ from the sum of individual figures for different countries that are derived from samples.

Appendix 6: Standard definitions and notes

| | |
|-------------------------------------|---|
| Agricultural exports | This uses the standard World Trade Organization (WTO) definition for agriculture. Products include Harmonised System (HS) codes 1–24 inclusive, with the exception of HS 03 and some of HS 16 (processed fish). It also includes casein, hides and skins, and raw wool. |
| cif | Cost, insurance, freight – the market value (or fob equivalent) of the imported goods plus the cost of freight and insurance from the source to destination. |
| Confidential classifications | <p>Under section 37A (d) of the Statistics Act, the Government Statistician may disclose details of external trade, movement of ships, and cargo handled at ports. However, Statistics New Zealand understands that the release of merchandise trade commodity information can, in some cases, place commercially sensitive information in the public domain. This can have detrimental effects on companies that export and/or import goods. In light of such circumstances, Statistics NZ is able to provide a limited form of confidential status for commodity items (at the discretion of the Government Statistician) on application by a company or business.</p> <p>In practice, all confidential HS codes are aggregated into the code 9809.00.00.00 to protect their confidentiality and to maintain total export and import values. Any aggregations of HS codes below this level, which encompass confidential 10-digit codes, exclude the confidential value(s) for these codes.</p> |
| fob | Free on board – the value of the goods delivered to the port of export and loaded onto a vessel for transportation out of the country of origin. Used for exported goods. |
| Government services nie | These comprise transactions of central government, the central bank, and local government. Both New Zealand government and foreign government transactions are recorded. |
| Insurance | Insurance and re-insurance of all types, including freight insurance. The values recorded alongside insurance measure the value of insurance services provided by an economy to non-residents (the Ministry of Foreign Affairs and Trade (MFAT) ‘exports’ series or, in Balance of Payments (BoP) terms, the credit item) and the value of insurance services purchased by residents from non-residents’ insurers (the MFAT ‘imports’ series, or BoP debits item). Insurance services is measured by multiplying the total amount of insurance premiums exported or imported by the five-year average domestic service charge ratio. The latter is the ratio of the domestic insurance service charge to total domestic premiums when the service charge is calculated as premiums minus claims. |
| Merchandise goods | Tangible, movable goods crossing the customs frontier. |
| nes | Not elsewhere specified |
| nie | Not included elsewhere |
| Non-agricultural exports | This uses the standard WTO definition. Non-agricultural exports comprise all other exports not included in agricultural exports. |
| Non-merchandise goods | Goods returned after repair or modification in New Zealand; goods on short-term loan or lease; and service transactions, eg computer data tapes and drawings. |
| Other | This item covers those international service transactions not covered under the travel, transportation, insurance, or government services nie items. They include communication services, construction services, financial services, computer and information services, royalties and licence fees, personal, cultural, and recreational services, and other business services. Other business services includes merchanting, and other business, technical, and professional services. |
| Re-exports | This data records goods brought into New Zealand and exported without a ‘substantial transformation’. Although not a hard and fast rule, 50 percent value added is used as a yardstick to measure ‘substantial transformation’; above that level, the goods are classified as domestic exports. Trans-shipment goods are not included. Goods that are re-exported will have previously figured in some form in the import statistics. Re-exports are included in the general tables of this publication. |

| | |
|-------------------------|--|
| Services | Items that are generally intangible or not physically movable (eg export education and tourism). |
| Transportation | Transportation measures the value of transactions in transportation services between residents of different economies. Transportation services are those services provided through carriers (such as ships and aircraft) by their operators, and the goods and services consumed by carriers in the course of their operations. By international convention, exports are foreigners carried by a New Zealand carrier, either here or overseas. Imports are New Zealanders carried by a foreign carrier. New Zealanders carried by a domestic carrier (either here or overseas) constitute a domestic transaction and are not part of international trade. The types of services provided through carriers include the carriage of freight (exports and imports) and passengers. Other transportation services covered include the charter of carriers, and airport and harbour fees. Goods consumed by carriers in the course of their operations, including bunkering and provisioning, are recorded under merchandise goods. |
| Travel | Travel covers the goods and services acquired from an economy by individuals defined as travellers during their stay in that economy. The international carriage of travellers is not included here but is classified as transportation. |
| vfd | Value for duty – the market value of imported goods as used for Customs' valuation purposes for tariff assessment in New Zealand. |
| Additional notes | The merchandise trade statistics are incompatible with the services data. Services data is collected and collated by Statistics NZ in line with the principles set by the International Monetary Fund (IMF) for BoP data. These principles also have methodology for the collation and presentation of goods data that differs from that of the merchandise goods data used above. The key point is that you should not add the merchandise trade figures to services to obtain an overview of 'goods and services trade'. Instead, readers are referred to the full BoP series, which adjust merchandise goods values according to the principles set down by the IMF. In particular, the value of imported goods is adjusted to a fob-equivalent basis in BoP statistics, but not in merchandise trade series. More information on BoP concepts and methods is available from Statistics NZ. |
